63. (a)

The first term of an arithmetic sequence is 8 and the $15\mathrm{th}$ term is 71.

Find the common difference, and hence find the sum of the first 15 terms.

$u_{15} = u_1 + 14d$: $71 = 8 + 14d$ *(M1)*

$$d = 4.5$$ **A1**

$$S_{15} = \frac{15}{2}(u_1 + u_{15}) = \frac{15}{2}(8 + 71)$$ *(M1)*

$$S_{15} = 592.5$$ **A1**
