127. (a)

Consider the expression $(2 + 3i)(4 - i)$.

Simplify it to the form $a + bi$, and find a and b .

$$8 - 2i + 12i - 3i^2 \quad (M1)$$

$$= 8 + 10i + 3 \quad \mathbf{A1}$$

$$= 11 + 10i \quad \mathbf{A1}$$
