141. (a)

Points A and B represent $z_1 = 1 + 2i$ and $z_2 = 4 + 6i$ on an Argand diagram.

Find the distance AB .

$$AB = |z_2 - z_1| = |3 + 4i| \quad (M1)$$

$$= \sqrt{9 + 16} \quad (M1)$$

$$= 5 \quad \mathbf{A1}$$
