146. (a)

The point representing $z = 3 + 4i$ is rotated 90° anticlockwise about the origin.

Find the image, in the form $a + bi$.

rotating 90° anticlockwise about the origin corresponds to multiplying by i (M1)

$$i(3 + 4i) = 3i + 4i^2 \quad (M1)$$

$$= -4 + 3i \quad \mathbf{A1}$$
